MONTANA'S SUPERSTATION

KSKY 106.9
TODAY'S COUNTRY FAVORITES

KBZM-FM's transmitter site is situated on Lone Peak in Big Sky, MT, at 11,166 ft., the highest transmitter location in the Great Northwest and more than a mile higher than any other site in the region. The addition of **KKQX** in 2006 introduced a clean, clear signal to the Gallatin Valley and the combo of 104.7 & 105.7 created Montana's Superstation, which delivers a coverage area that is unequalled by any other station, combo or group of stations.
